

2nd International dedolight Lighting Competition

Tools that you may be working with

These are the tools we can supply. Your choice. Also, possible accessories according to availability.

SPS5

5-light halogen lighting kit including 2 soft boxes, background projection and inserts for background projections, gobos, background effect filters and more.

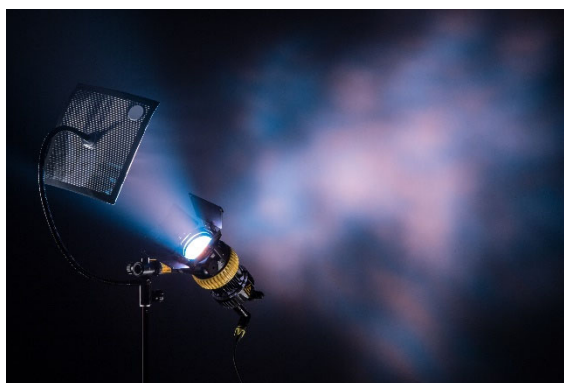

KLT7-3-BI

A kit with 3 bi-colour high-performance LED focusing lights, 2 soft boxes, one background projection attachment and inserts for the projection attachment, choice of gobos and background effect filters.

EFLECT

Set of Effect multi-mirror reflectors and holding devices to create a multitude of fantastic background effects, ranging from sunspots falling through a deciduous tree, to wonderful flowing colour backgrounds.

dedolight Lightstream reflectors and grip accessories

We can offer a dedolight parallel beam intensifier to fit on one of your focusing lights, enhancing the light output multiple times. Included in the set will be four reflectors, 25x25cm, and some selection of holding devices, bending arms, to attach and adjust them.

dedolight Lightstream table top set

Mini reflectors and holding devices. Ideally suited for table top creative lighting, food, cosmetics, any small subjects that you would usually shoot in table top manner in a studio, where you need the highest degree of control and still create many different lighting effects, where one light head can be used to produce many different effects in many different directions with different shapes and characters.
